ش		●				

Ignore the arrows for now.
What can you say about the quality of the building block
ش ن٣ش
just by looking at the matrix?

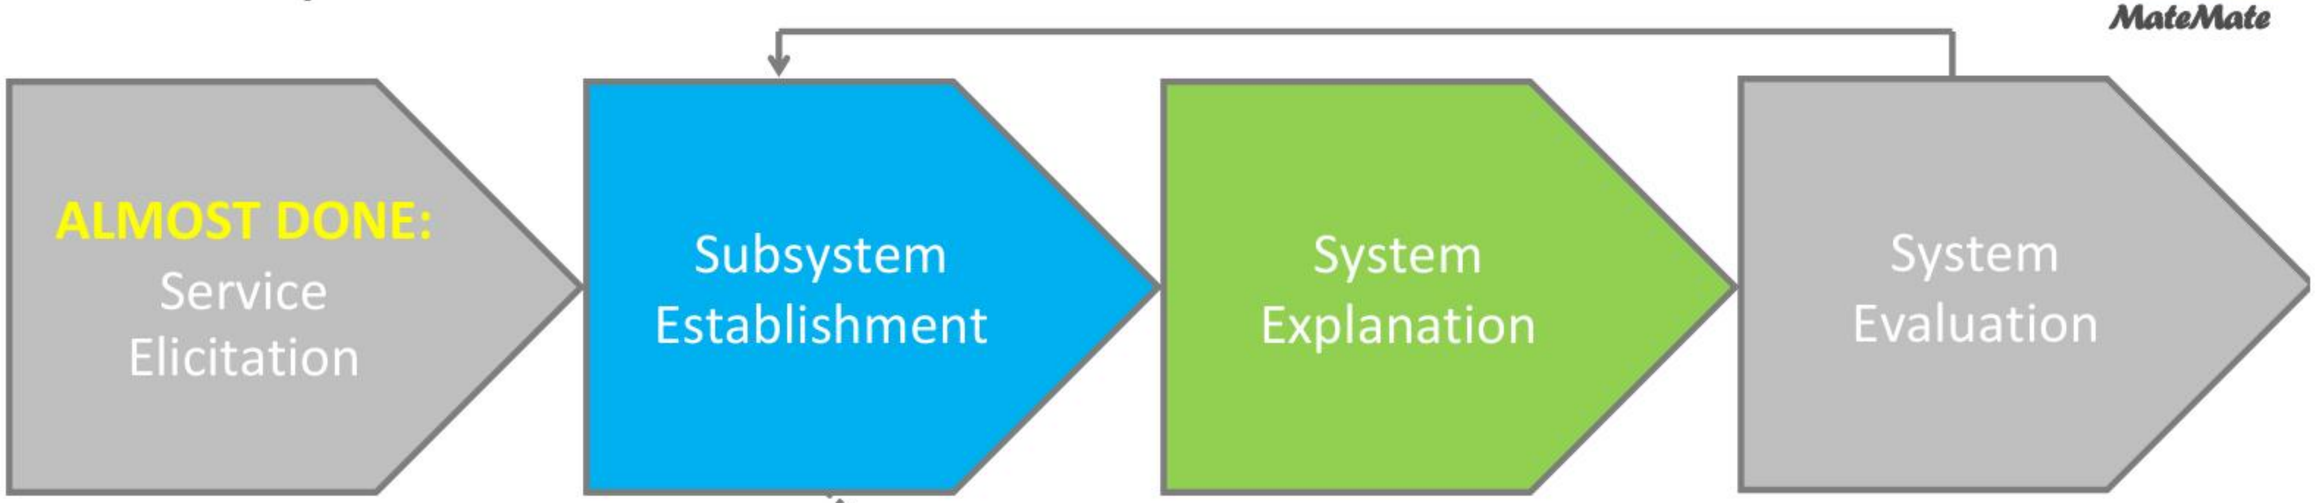
Class Group Exercise: Service Based Architecture Development

This is where the architecture development of MateMate currently stands:



List of subsystems
Mapping of services to them
Good name for each subsystem
„Blood type“ of each subsystem
Allowed-to-use specification

Make a good architecture proposal.

Everyone should keep the results of their group in digital form!
