

Class Group Exercise: *ISearchProduct* Specification

Extend the interface specification checklist by at least **three** questions (you may borrow from best-practice examples on the Internet or your company).

Using the extended list (not just the extensions), review the interface specification of the the person with the last name that comes **first** in a lexicographic ordering.

Document your findings.
Give the interface specification under review a **quality rating** on a scale from 0 to 100 (100 = perfect quality).
